

Herculite™ Ultra Flow

Nanohybrid Flowable Composite

A flowable that works just the way you want it.

Herculite Ultra Flow combines the long-standing expertise of the Herculite brand with a flowable composite. Flowing easily when used as a base/liner and maintaining its shape when used in small restorations, Herculite Ultra Flow is the perfect match with the esthetics and performance of Herculite Ultra.

Features & Benefits

Flows Easily and Maintains its Shape

High Wear Resistance

Increased Radiopacity

Decreased Shrinkage

Long-Lasting Polishability, Exceptional Ease of Polish and Gloss Retention

Harmonize™ & Herculite™ Ultra Flow: The Perfect Duo

For decades, the Herculite brand has established clinical success in the practice. Now, Herculite Ultra Flow combines the long-standing expertise of the Herculite brand with a flowable composite. Plus, its the perfect match with the esthetics and performance of Harmonize.

Flows Easily and Maintains its Shape

For a flowable, having one viscosity that flows into all internal line and point angles while holding its shape may seem impossible, however, the rheological additive in Herculite Ultra Flow gives it the viscosity needed to perform the feat - allowing it to flow to the boundaries of the restoration.

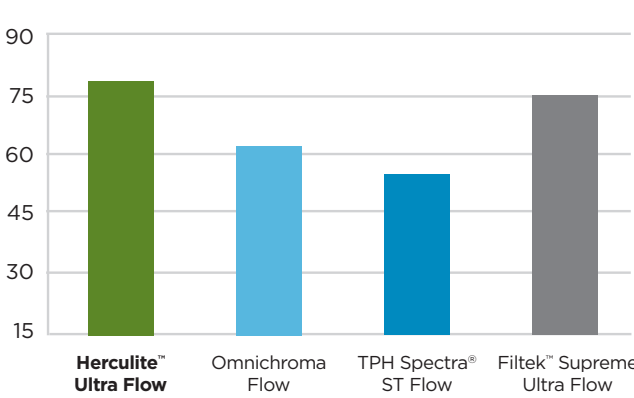

The same additive encourages viscosity build-up after the material has been placed so it won't run or drip.

Low Shrinkage*

Leading experts cite low shrinkage as a critical feature of flowable composites; Herculite Ultra Flow was specially designed with a high-filler loading rate for minimal polymerization shrinkage.

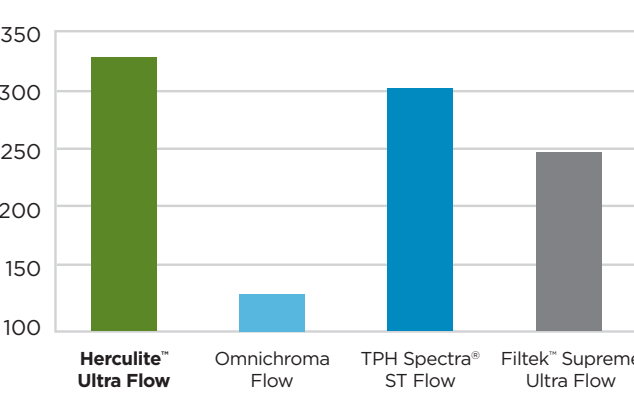

High Gloss Retention*

While initial gloss is a critical feature, gloss over time is more important. It is an indication of how long the esthetics of the restoration will last. Herculite Ultra Flow retains gloss after aging better than many other leading materials.

* Contrast gloss = Specular reflection @ 60° / Diffuse reflection

Over 300% Radiopacity*

Herculite Ultra Flow is easily discernable on radiographs.

*Data on file. Herculite is a trademark of Kerr Corporation. All other trademarks are properties of their respective owners.

Ordering Information

For your convenience, Herculite Ultra Flow comes in 12 shades.

REFILLS:

- 2 Syringes (2g each)
- 20 Dispensing Tips
- Technique Guide
- Directions for Use

ACCESSORIES:

33370 - Tip Refills (pack of 50)

SHADES:

35392 A1
35393 A2
35394 A3
35395 A3.5
35396 A4
35397 B1
35398 B2
35399 C2
35400 D2
35401 XL1
35402 XL2
35403 Universal Opaque
