UltraEZ™

Desensitising Gel with Potassium Nitrate and Fluoride

Help your patients look and feel their best. UltraEZ desensitizing gel features potassium nitrate, which has been shown to help decrease sensitivity so your patients can keep smiling.

- Unique sustained-release formula provides benefits even after application
- Features potassium nitrate, which has been shown to help decrease sensitivity
- Can be used before and after whitening treatments
- Available in prefilled trays and syringes

UltraEZ Desensitizing Gel Prefilled Tray Patient Instructions

See Instructions for Use for complete instructions, warnings, and precautions.

SAY HELLO TO CUPS

Enamelast fluoride varnish is a xylitol-sweetened, 5% sodium fluoride in a resin carrier. Enamelast fluoride varnish's superior retention promotes enhanced and sustained fluoride release. Its superior fluoride release and uptake means more fluoride is absorbed into the enamel over a longer period of time than other leading competitors.

Available in the following delicious flavours or similar :

- **Walterberry**
- **Orange Cream**
- **Cool Mint**
- **Bubble Gum**
- **Caramel**
- **Flavor-Free**
- **Vanilla**
- **Raspberry**

Don't Forget!
4529 - Enamelast Application Brushes, 200 pk.

Forma™

ZIRCONIA NANO-HYBRID COMPOSITE

- Smooth and easy to sculpt
- Does not stick to instruments
- Won't slump out of place

WHERE STRENGTH MEETS SIMPLICITY.

FORMA composite offers natural tooth color with just one body shade (OneStepColor) or for restorations that require layering, there are dentin, enamel, and effect shades with different degrees of translucency. Its formula, consisting of zirconia and ytterbium trifluoride, allows all shades to offer excellent optical and mechanical properties: translucency, opacity, fluorescence, and strength.
